Here in this article, I am going to walk you through on how to install the free SSL Certificate from your Cpanel

Also Read: [How to Login to Your Hosting Control Panel on Realjossy](#)

First, Login to your hosting Cpanel and locate **SSL Certificates Tools**

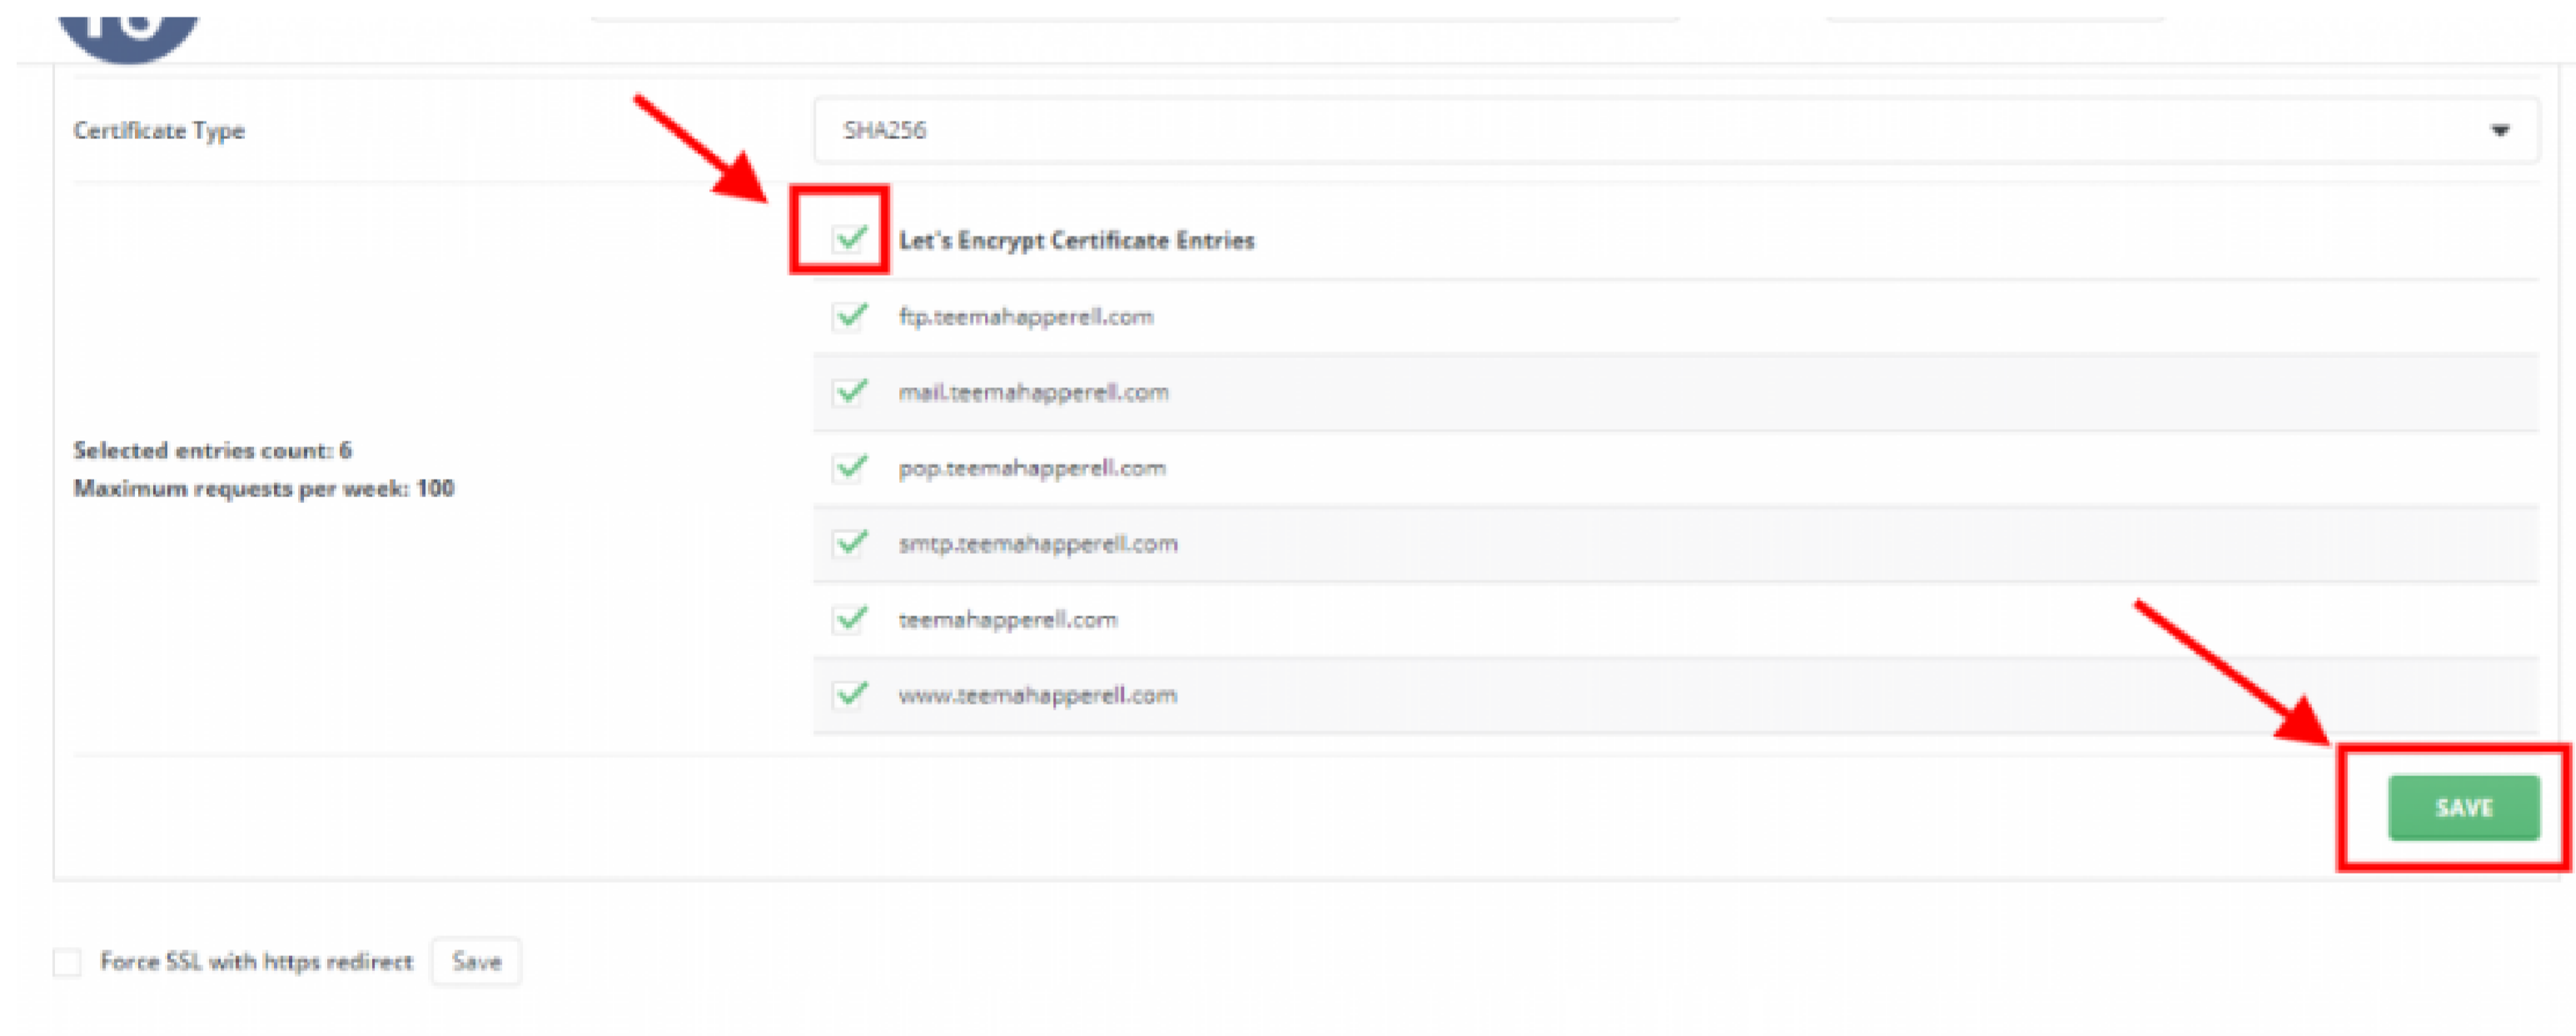

Open the tools and click on **Free & automatic certificate from let's Encrypt**

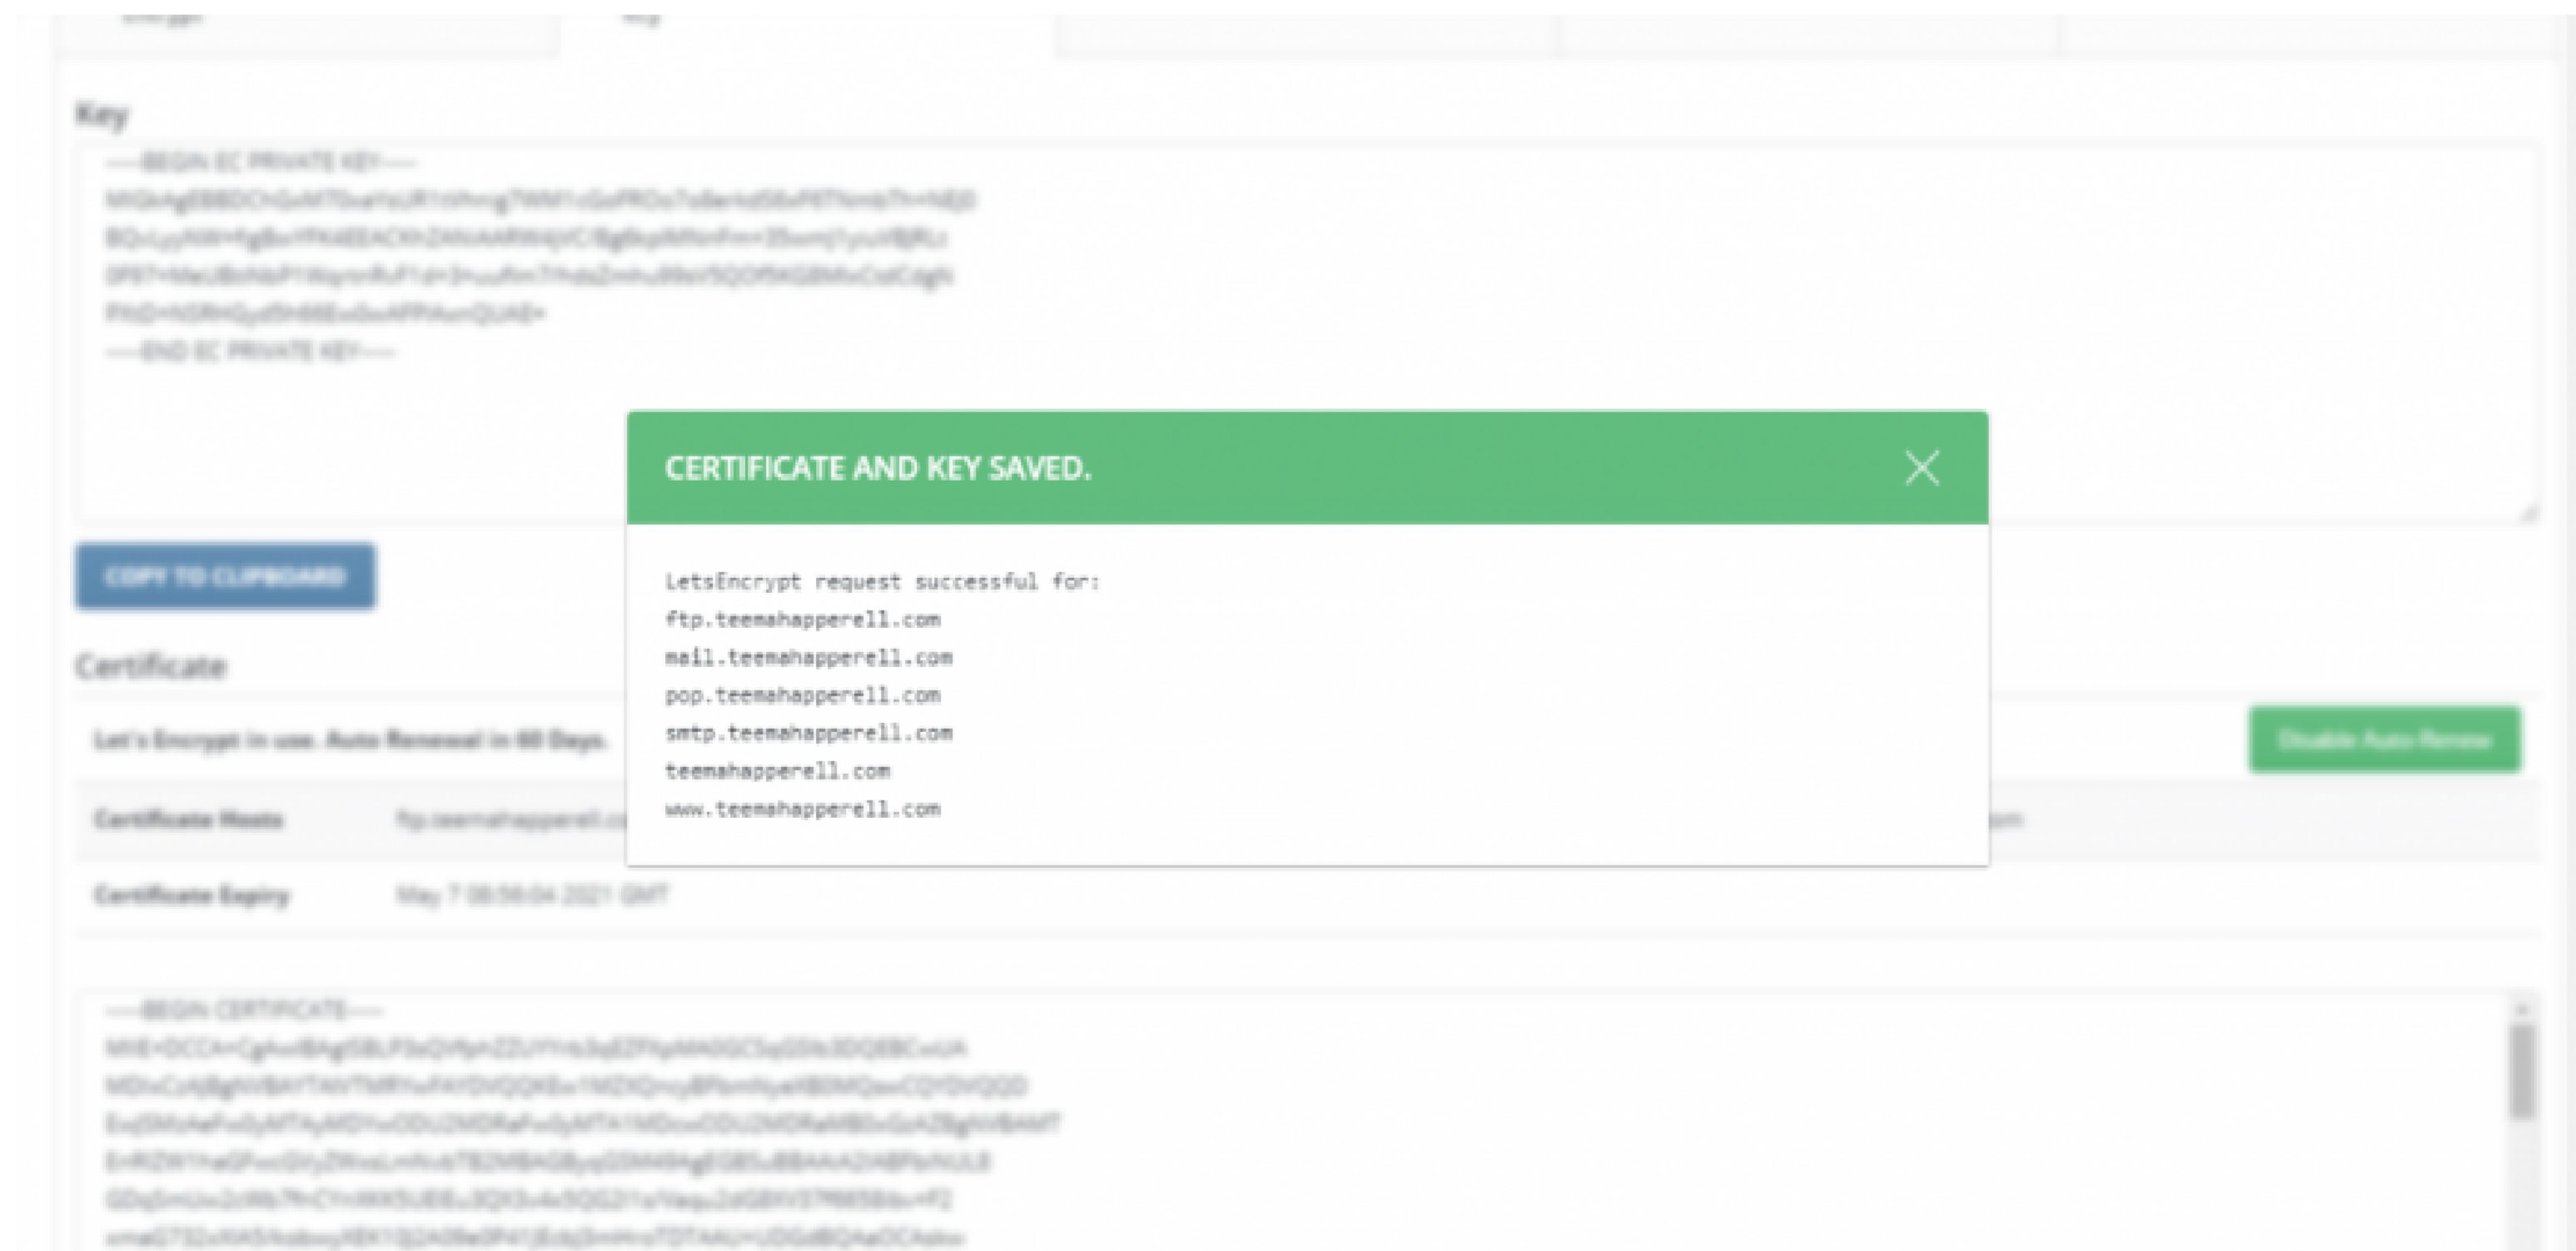

Check the **box** to select all the boxes and click the **SAVE BUTTON** to activate SSL Certificate

See image below

You will get a successful activation message

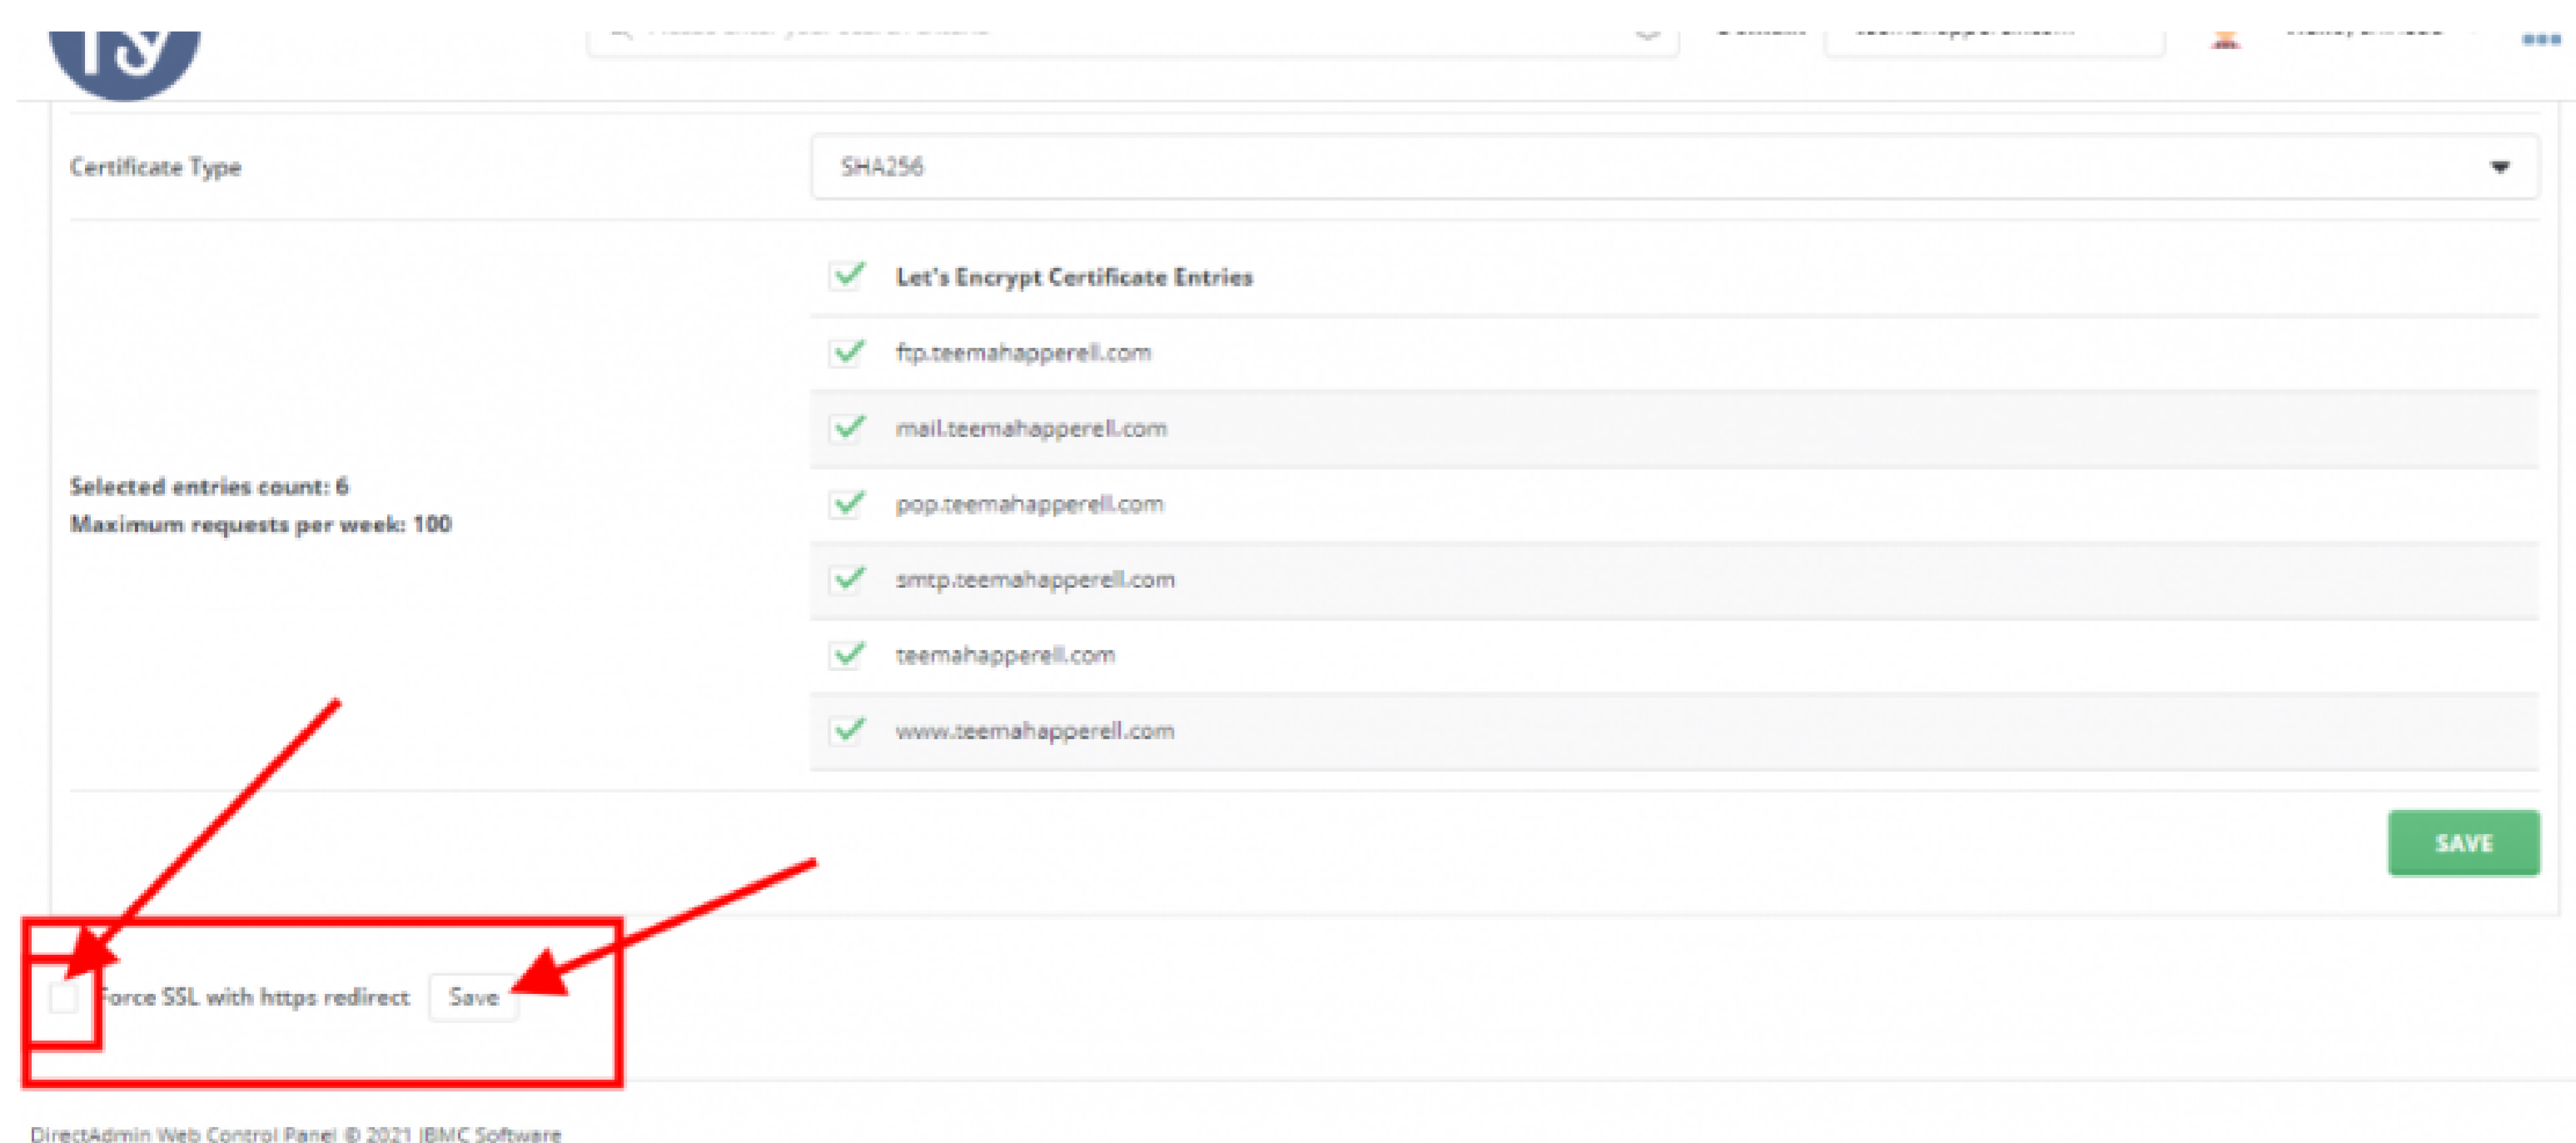

If you get an error message, please log out and login in again and then retry.

Close the message and go back to **Free & automatic certificate from let's Encrypt**.

Scroll down to activate **Https redirect**

See image below

Check the box and click Save to save your settings

This is all you need to do

Go to your website and refresh it, your website will be secured with SSL Certificate
